

# The Inventions of Benjamin Franklin

## A Mercer Museum Scavenger Hunt

Benjamin Franklin was one of the most brilliant, creative and productive Americans of the 1700s. You can find a number objects relating to the inventions of Franklin in the museum collection.

### 2<sup>nd</sup> Floor in Central Court

1. With heavy tool something like this, Franklin's arm surely got tired.

This machine helped create something so people could receive information from all over the American colonies. He used letters of the alphabet and a fluid of black.

What could it be this tool which produced a product that kept us interested from front to back!

---

2. Franklin first felt the need to have a company formed to help put out flames.

It was important for these men to have enough water, because dealing with fire is not fun and games.

What object in our collection did the volunteers use to pump water to put out fires?

---

3. Franklin was a big fan of cleanliness and maintaining good health.

Using this object in Franklin's time was not common, but he used it quite a lot. Just fill it up with water and receive some relaxation.

---

4. Franklin worked to fix this service, so things were delivered fast and on time.

Letters, papers and news arrived from all around;

During Franklin's day, this service was located in a store.

Where did people pick up these items sent from different towns?

---

#### 4<sup>th</sup> Floor

5. Franklin definitely needed help with his vision.

No doctor could improve his focus, both far away and near.

But Franklin was tired of carrying this extra pair, so he created this object, which now helps millions see everywhere.

---

#### 5<sup>th</sup> Floor

6. Franklin said that to be "healthy, wealthy and wise" one should be "early to bed and early to rise".

One of these might help you know when it was bed time, and when it was time to "rise."

---

#### 6<sup>th</sup> Floor

7. This particular object was inspired when Franklin kept burning his knees.

He designed it and wrote detailed instructions so that every ironworker could make one for whoever wished to keep warm.
